Floweret MD

How to find your documents and messages in the patient portal

Your patient portal is where you can view your health records, upload files, message our office, and manage appointments. Follow these five steps to find your documents.

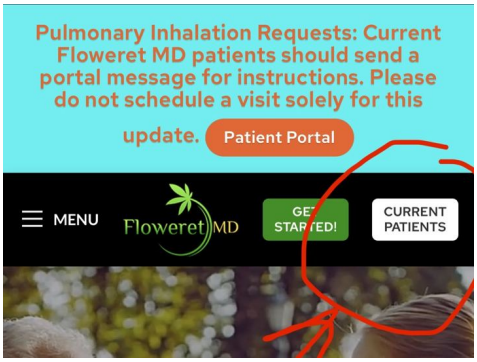

You will need: the email address and password you used to create your Floweret MD account.

1

Go to floweretmd.com and tap Current Patients

Open your web browser and go to **floweretmd.com**. At the top of the page, tap the white **Current Patients** button. The orange **Patient Portal** button in the blue banner takes you to the same place.

Tip: The Current Patients button is in the top right corner of the website.

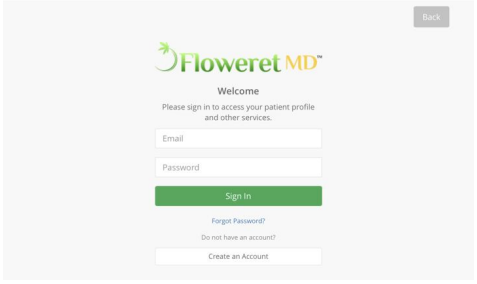

2

Sign in with your email and password

Enter the email address and password you used when you created your account, then tap the green **Sign In** button.

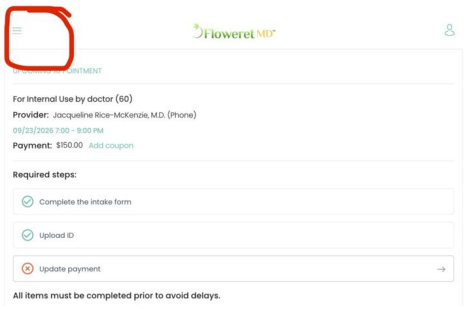

Tip: Forgot your password? Tap **Forgot Password?** under the Sign In button and follow the steps sent to your email.

3

Open the menu

After you sign in, you will land on your home page. Tap the **three small lines** in the top left corner of the screen to open the menu.

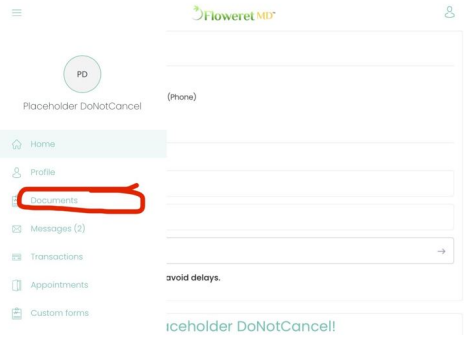

Tip: On a computer, the menu may already be showing on the left side of the screen. If so, skip to the next step.

4

Tap Documents (or messages)

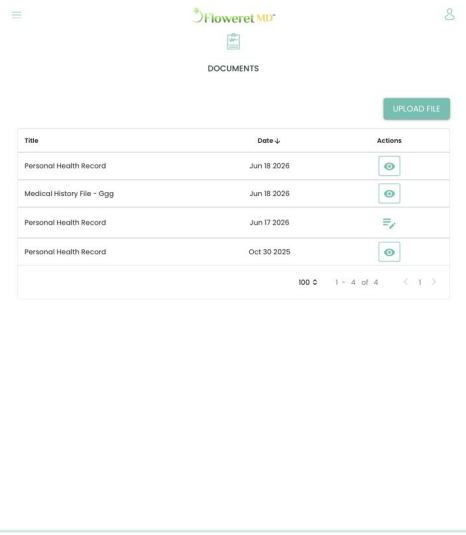

In the menu, tap **Documents**. It is the third option, right under Profile. *(Tap **Messages** to view and send messages.)*

5

View your documents (or messages)

You will now see a list of your documents with the newest at the top. Tap the **eye icon** next to any document to open and view it.

Tip: If you see a **pencil icon** instead of an eye, that document still needs your input. Tap it to open and complete it. To send us a file, tap **Upload File**.

Still need help?

Sign in and tap **Messages** in the menu to send our office a note, or use the chat bubble in the bottom right corner of **floweretmd.com**.
